5.1 JBuilder Projects

JBuilder IDE   ,   project   . JBuilder
projects   ,   ,   ,
.
project   . project   .
project   .
project
.

5.2 Creating a new project

.

1. object gallery   [File|New Project]   [File|New]
   , [Project]   , [Project]   .

[Project Wizard]   .

2. [Name]   "MyProject"   project   .
        JBuilder   ,
                                          . JBuilder   project
project   project   project   ".jpx"
    . project   XML   .

          project   , project   [Directory]
                        project   . project

project   .
project   ,
                              .

     [Help]   .

3. Project wizard   [Next]   .
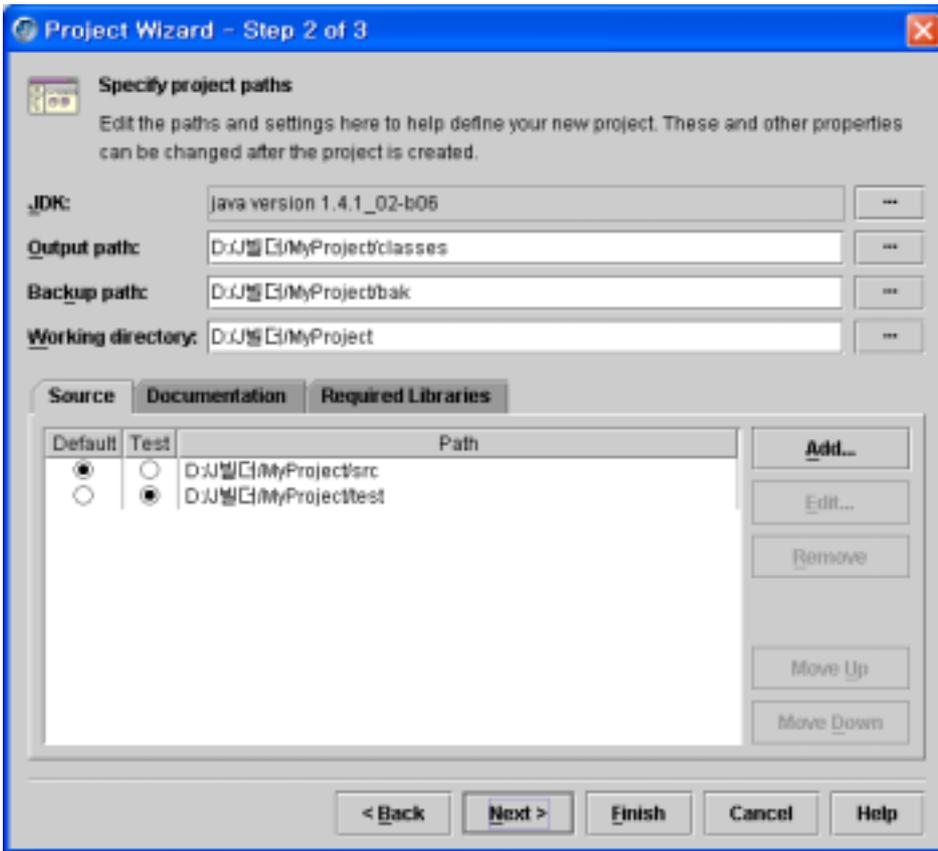

Project wizard   .   project
                                           .   .
[JDK]   project   JDK   . JBuilder   JDK "..."
        JDK   . [Output path]   JBuilder
                          JBuilder   . [Backup
path]   . [Working Directory]   project
                            JBuilder   project   . [Source]
[Default path]   project
        .

4. [Finish]   .
Project wizard   [Next]   ,
                    project   . [Finish]
        JBuilder   project   .   project pane   project
                    .

5.3 Adding files to a project
JBuilder   ,   (automatic source path
discovery feature)   , project
                                .   ,

packages   project   .

1. project pane   [Add Files / Packages / Classes]   ,
project pane   project file node   [Add
Files / Packages / Classes]   .   packagee   project
          .

2.   [Explorer]   ,   packages
[Packages]   .
3.   packages   .
      [Shift+Click]   [Ctrl+Click]   .
4. [OK]   project pane   package   .

                          package   project   project pane
          .

1. project pane   package   .
      (source)   project   package   .
package, project, directory   (Child)   .

2. [New]   .   package
          .

Menu 옵션	의미
New	Class	Class 마법사 열음
New	Interface	Interface 마법사 열음
New	Package	새로운 package 생성 대화상자 열음
New	File	새로운 파일 생성 대화상자 열음
New	Directory	새로운 디렉토리 대화상자 열음

3. package .

5.4 Viewing a file

project project pane node ,
project pane content pane , ,
. package , package ,
package package .
package .

project AppBrowser content pane .
project .
"X" . project

.

5.5 Adding a new Java source file

JBuilder Java .
JBuilder Java project
. , Class Java class , Application Java
2 Java . project Java class
(empty file)
.

Class Java class .

1. [File|New|General] Class Class
.

2. Clsss [Help] .
3. Class .
4. [OK] .

 class , project .
project pane . Java project
 .

1. [File|New File]
 [File|Open File] .

2.   .
3.   ".java"   ,   ".java"
   .
4. [OK]   .   content pane   .
                        [Add saved file to project]
                project pane   .

5.   .
6.   [File|Save <"file name">]   [Ctrl+S]
                .
7. project pane   [Add Files/Packages/Classes]   project
pane   project file   ,
[Add   Files/Packages/Classes]   .   project
Packages   .
8.   [Explore]   .
9.   ,   , [OK]   .

5.6 Removing and deleting
                project   (remove)   (delete)   .
                        project   ,   .
                        project   .
                        project   , package,
        .

1.project pane   project pane
[Remove From Project]   ,
          [Remove From Project]   .

2. [Remove From Project]
      [OK]   .   project pane   , project   .
                                                                  .

Remove from Project?

Removing "GoodEvenningApplet.java" from project. Are you sure?

[확인] [취소]

project   ,   , packages
                                                                    [Delete <"node
name">]   .

5.7 Renaming projects and files
project   .

1. project pane   project   .
2. [Project |Rename]   [File|Rename]   , project pane
                       [Rename]   .
3. [Rename]   [OK]   .

        content pane
      .

1. content pane   .
2. [Rename <"node name">]   .
3. [Rename]   [OK]   .

                                                          .

[File | Sava As]   .

    >
project   package
                      . JBuilder Developer   Enterprise   rename refactoring
          .
        .

5.8 Opening an existing project

project .

1.   [File|Open Project] .
2.   project   prject .
3. project   ,   pane
      project .

5.9 Closing projects
project .
1. project pane   [Close Project] .
2. project pane   project (.jpx)
[Close Project] .
